

M1132 SERIES

DC/DC POWER SUPPLY

PRODUCT HIGHLIGHTS

- COMPACT
- 6 OUTPUTS
- UP TO 320W

Applications

Military (Airborne, ground-fix, shipboard), Ruggedized, Telecom, Industrial

Special Features

- High density
- Wide input voltage range
- Input / Output isolation
- Remote sense
- External On/Off
- Fixed switching freq. (250 kHz)
- External sync. capability
- EMI filters included (5 μ H LISNs)
- I²C communication
- Non-latching protections:
 - Overload / short-circuit
 - Over-voltage
 - Over-temperature

Electrical Specifications*

DC Input

- Steady-State: 18 to 48 V_{DC}
- Comply with MIL-STD-704F normal transients

DC Outputs**

#	Voltage range	Current range	Power range
1	3.3-12 V	0-10A	0-100 W
2	3.3V-6V	0-30A	0-120W
3	3.3V-6V	0-15A	0-60W
4	-20V- -3.3V	0-4A	0-22W
5	2V-2.5V	0-2A	0-4.5W
6	10V-28V	0-0.65A	0-18W

Total output power: up to 320 W

Isolation

Input to Output: 200 V_{DC}
 Input to Case: 200 V_{DC}
 Output to Case: 100 V_{DC}

Output Voltage Regulation

Less than $\pm 1.5\%$ (no load to full load, $-55\text{ }^{\circ}\text{C}$ to $+85\text{ }^{\circ}\text{C}$ and over normal input voltage range).

Efficiency

86% - Typical (nominal input voltage, full load, room temperature)

EMC

Complies with MIL-STD-461F (with 5 μ H LISNs): CE101, CE102, CS101, RE102.

Ripple and Noise

Typically less than 50 mV_{p-p} (max. 1%), measured across a 0.1 μ F capacitor, with 10 μ F capacitor across load.

Transient Over-and-undershoot

Output dynamic response of less than 5% at load step of 50%-100%. Output returns to regulation in under 1 ms.

Communication

I²C protocol available for input voltages, temperature for all output voltages (GAx, SCL, SDA)

* Unless stated otherwise, all measurements specified here were taken under full load conditions, at steady-state input voltage over full temperature range.

Protections *

Input

- **Under-Voltage Lockout**
Unit shuts down if input voltage drops below 16.5 ± 1 V.
Automatic restart when input voltage rises above 20 ± 1 V.
Minimum hysteresis: 2 V.
- **Over-Voltage Lockout**
Unit shuts down if input voltage rises above 55 ± 2 V.
Automatic restart when input voltage falls below 38 ± 2 V.
Lockout is delayed by at least 100 ms from the onset of the over-voltage state, to allow operation through normal transients, per MIL-STD-704 and MIL-STD-1275.

Output

- **Over-Voltage Protection**
- **Overload / Short-Circuit Protection**
Continuous protection (10-30% above maximum current) for unlimited time (Hiccup).
Automatic recovery when overload/short-circuit removed.

General

- **Over Temperature Protection**
Automatic shutdown in case internal temperature rises above 105 ± 5 °C.

Environmental Conditions

Designed to meet MIL-STD-810G

Temperature – High

Method 501.5
Procedure I – Storage: up to +125 °C
Procedure II – Operation: up to +85 °C cooling surface

Altitude

Method 500.5
Procedures I - Storage/Air Transport: up to 40 kft
Procedures II - Operation/Air carriage: up to 70 kft

Fungus

Method 509.5
Does not support fungus growth, in accordance with the guidelines of MIL-STD-454, Requirement 4.

Vibration (random)

Method 514.6
Procedure I – General Vibration
Category 24 – General minimum integrity exposure

Temperature – Low

Method 502.5
Procedure I – Storage: down to –55 °C
Procedure II – Operation: down to –55 °C

Humidity

Method 507.5
Up to 95% RH

Salt Fog

Method 509.5

Shock

Method 516.6
Procedure I – Functional Shock
40 g, 11 ms Terminal peak sawtooth shock pulse (all directions)

Environmental Stress Screening (ESS)

Including random vibration and thermal cycles is also available. **Please consult factory for details.**

* Thresholds and protections can be modified / removed – please consult factory

Pin Assignment

Connector type: Positronic DD78M4000C-15 or eq.
 Mating connector: M24308/2-15F or eq.
